

Screwdriver with Magnetic

Jetech screwdriver handles specially designed, registered world wide patent which ergonomically make strong and comfortable hand gripping with maximum torsion

Shaft and Back-end Joined Design

Jetech go through softgrip screwdriver is designed its hexagonal shaft go through handle and joint the rear end impact cap which allow hammer striking force go through to shaft head without damage

- Jetech screwdriver blades, made of high quality chrome vanadium alloy steel, through precision machining process and consistent heat treatment, to make blade tips perfectly fit screw heads at use which achieve maximum torsion even higher than any country's product standard

- Worldwide Patent

the internal structure of screwdriver handle

Jetech screwdriver handle is made of modified polypropylene plastic inside and of thermal plastic elastomer outer side to obtain the perfect comfortable hand gripping and high torsion simultaneously
