

Socket

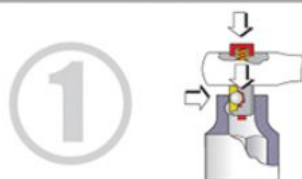

Internal part is made by cold extrusion forming to ensure precision.

The inner part of handle is made of advanced PP material and the outer part is made of the elastic rubber resin to advance the grab feel and torsion.

45 teeth geared structure enables rotation angle at 8 degree, convenient to use in narrow space.

2

- Press top button to push square head into socket
- Releasing top button, making spring supported ball inside automatically locks the socket to ratchet head.

One piece internal crescent shaped gear makes the products durable enough against wear off.

45 Teeth Gears

Jetech sockets and ratchet wrenches are made of high quality Cr.V alloy steel. Big size socket is made of Cr.Mo, cold forging and processed with precision.

Guaranteed maximum torsion of ratchet wrench handles in three different drive sizes.

1/2 douille	512 N.m
3/8 douille	203 N.m
1/4 douille	62 N.m
